**Extremely compact, lightweight, portable design for ease of use in elevated work positions.
Low hand-pull force for highly reliable pulling and lifting to the last click.**

Kito's original free chain adjusting mechanism

A required chain length is provided instantly with ease by simply turning the selector lever to "N (neutral)" position.

Net weight of just 1.6kg!
(LX003)

Lever length of just 150mm!
(LX003)

Reliable load-holding performance

The LX series, designed with a single-step reduction gear, is characterized by a small manual fastening force and assured load holding. Reliable load fastening can be provided to the last clicking of the lever.

Extremely compact and light

Kito's innovative technology makes the LX series extremely compact and light. It's very easy to carry, and easy to use, even in tight quarters or in elevated work locations. What's more, it can be conveniently stored in a special carrying case (LX003 only).

Maintainability

Fasteners are designed to protect threads from damage making maintenance easier.

Nickel-plated chain

Kito's unique R&D produces world-class performance. The grade 100(1000 N/mm²) chain, made from a special high strength alloy, features an unbeatable combination of toughness and resistance to corrosion & wear. (For special environments consult your Kito distributor since corrosion resistance varies depending on corrosives involved)

Minimum headroom (distance) between hooks: 205mm (LX003)

Hook latch with safety mechanism

The hook latch employs tip-supporting structure for guaranteed holding and is highly resistant to deformation and damage.

Perfect Fastening

KITO LEVER BLOCK™ LX Series 250kg/500kg

Two capacities available – the LX003 has a rated capacity of 250kg, and the LX005 has a rated capacity of 500kg.

Extremely compact & light, these LX series hoists are suitable for work in tight quarters or elevated locations where fastening, fixing, or positioning of light loads is required.

- Load fastening
- Tension
- Lifting/lowering
- Anchoring
- Positioning
- Distortion correction
- Alignment of structures
- Other load handling
